

Accessing The QR Code

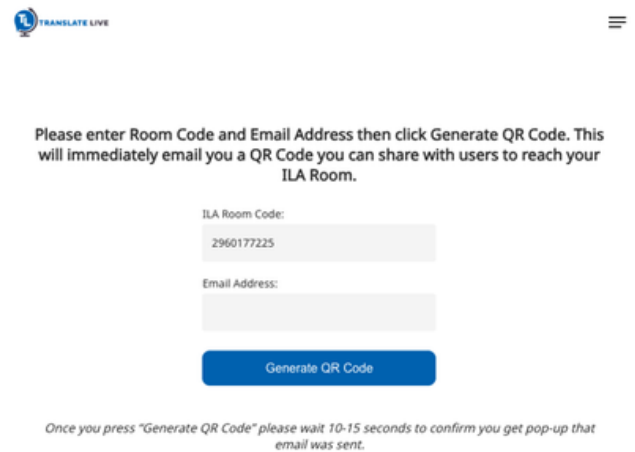

Getting the Weblink:

The weblink appears right beneath the QR code in the pop-up box. If on the webhost you can copy this link straight from the website and send it to whoever you would like. If using the tablets, you will need to write down the link and type it into your computer to save it.

Getting a Copy of the QR Code:

To get a copy of the QR code, click the “Email QR Code” button.

Enter in your Email Address and press “Generate QR Code.” You will receive an email that contains an image of the QR code. Note: The email comes from Wordpress and may go to your spam folder.

Tips:

- Store the QR codes on your computer so you can use them at any time.
- The QR codes remain unchanged unless you change your Room Codes.
- Keep the QR codes for your 1-On-1 Room and your Broadcast Room labeled separately so you can easily distinguish between them.
- Save the weblink in a document or a notes app on your computer so you can access it anytime.
